BAILEY OLYMPUS

– FOR YOUR HOLIDAYS OF A LIFETIME

Olympus is a leisure vehicle that allows you to enjoy life to the full.

Providing performance and value in equal measure, it is a caravan that will make you re-think where and when you choose to get away from it all.

Olympus – For your holidays of a lifetime

Olympus

Alu-Tech Bodysell

PRODUCT DEVELOPMENT

To bring a product as innovative as Olympus to market it has been necessary to implement the most comprehensive test and validation programme ever undertaken for a new touring caravan.

For over two years, the Bailey Development Team has subjected Alu-Tech built caravans to a series of accelerated life tests to enhance their structural durability and thermal capabilities at the Millbrook Proving Ground – the first choice facility of the global automotive industry.

Additional research carried out by The University of Bath – the leading independent authority in the field of towing dynamics – into body shell strength and stability has ensured that every aspect of the design has been thoroughly evaluated.

The result is a caravan that is a triumph of engineering and technological advancement. A product that it is so unique that it has necessitated the commissioning of over **one hundred bespoke tools** to build it, with a design so advanced that it has **five new patents pending**.

Olympus – one day, all caravans will be made this way.

Alu-Tech Development Partners

UNIVERSITY OF
BATH

ALL WEATHER VEHICLE

The new Bailey
Olympus, featuring the
Alu-Tech body shell,
allows you to holiday
all year round –
whatever the weather.

Thicker body shell panels featuring superior grade polystyrene, and extra insulation to pipe runs and wheel boxes have greatly enhanced the thermal properties of the caravan. As a result Alu-Tech built caravans are the first to achieve the **Grade III Classification of Thermal Insulation for EN1645-I**, keeping you warm in winter and cool in summer, as well as making your caravan more economical to own.

Engineered to ensure it remains weatherproof and structurally sound, the Alu-Tech body shell sets new standards in durability. A new design interlocking external framework helps reduce the number of external joints and fixing points by 90%, thus minimising the number of potential water access points and improving the overall integrity of the protective shell.

While timber free body shell panels, featuring a composite plastic internal skeleton and low absorbency buffer zones surrounding windows and doors offer a second line of defence, limiting the impact any possible ingress may cause.

So confident are we of the performance of this new shell that it comes supplied with a market leading **ten year integrity guarantee*** - thus providing you with additional peace of mind by protecting your investment.

ALL TERRAIN VEHICLE

The new Bailey Olympus really is the "go anywhere, do anything" vehicle.

The Alu-Tech Construction System incorporates state of the art vehicle technology featuring an interlocking aluminium external framework that clamps the body panels together to produce a shell that is considerably stronger than one manufactured using traditional methods - strong enough, in fact, to support the weight of a typical family estate car!

The five part assembly – including a unique single piece front and roof section – makes the caravan more aerodynamic and ensures a smoother and more efficient ride. Its more balanced overall design – with a larger proportion of weight concentrated at the centre – makes the caravan inherently more stable enabling it to take even the most demanding journey in its stride.

And when you consider that all these benefits of ownership have been achieved without a weight penalty you can begin to see why the Alu-Tech construction system is so unique.

Built with practicality in mind the new Bailey Olympus is much more than just a high performance body shell. Models also come supplied with the latest road safety equipment, including the AL-KO ATC Trailer Control System, , an AL-KO AKS Stabiliser and AL-KO shock absorbers to ensure trouble-free towing, whilst the optional AL-KO Secure wheel lock provides added protection for your investment on site.

COMFORT & PRACTICALITY

The first thing you will notice when you step inside an Olympus is the feeling of extra space. This is created by an increase in internal headroom which is now, thanks to the flat panel roof construction, a market leading 1.96m (6'5") throughout the length of the caravan.

A suite of floating fascia overhead lockers, with sturdy structural dividers, makes practical use of this additional height by maximising the high level storage capacity available.

The unique Alu-Tech body shell profile also produces extra room at the front of the caravan resulting in a more spacious lounge, featuring a window shelf wide enough to become a dedicated television station.

Market leading headroom 1.96m (6'5")

Olympus 534 in standard Monaco upholstery

Top left clockwise: Floating fascia overhead storage lockers, sculpted arm rests in wrap around configuration, wall mounted fabric magazine rack & high gloss kitchen worktop laminate

COMFORT & PRACTICALITY

Packed with home comforts Olympus provides you with everything you will need for a relaxing and enjoyable holiday.

Well equipped kitchens feature a built in microwave, a spacious Thetford 107 litre refrigerator plus a re-engineered Spinflo 4-burner gas hob and large capacity sink as standard. Entertainment systems are upgraded too with the inclusion of a branded stereo Radio/CD/MP3 player with iPod connectivity, complete with dual cone speakers for superior sound quality.

Models are available in a choice of two contrasting soft furnishing schemes in a wrap around configuration and come supplied with a full compliment of arm rests and scatters. While superior quality cushion construction and fully sprung base supports ensures that this caravan is every bit as comfortable as it looks.

Contemporary furniture designs in the Bailey 'pear' finish are enhanced with the introduction of new high gloss worktop laminates and premium quality fixtures and fittings in matt nickel. This stylish

interior is shown to its best advantage by clear canopy maxi and mini Heki rooflights by day and a battery friendly low voltage LED lighting system by night.

In short Olympus has it all and, thanks to the Bailey trademark value for money package, it is now available for considerably less than you might think.
